**100% PURE?**

**No...  
but we can  
do better!**

# We offer 3 postgraduate qualifications in freshwater management

## Postgraduate Diploma in Water Resource Management

1 year full-time or 2–3 years part time study (courses).

## Master of Water Resource Management

2 years full-time or up to 4 years part time study (courses and a research thesis). A “thesis only” option is available if you have appropriate and relevant postgraduate or work experience.

## PhD in Water Resource Management

3–5 year research thesis.

You can enrol in these postgraduate degrees at either the University of Canterbury or Lincoln University.

## Entry requirements

- A strong desire to improve the quality, availability and natural function of our freshwaters resources, and ...
- A Bachelor's degree (or equivalent) in a field of relevance to freshwater management.\*

## Start dates

Applications accepted until mid January for Semester 1, and early June for Semester 2.

It is usually better to start your qualification in Semester 1 if you can, as teaching builds on semester 1 courses. Thesis students can begin any time.

\*Natural, physical, earth, agricultural and social sciences, engineering, resource and environmental management, resource law, planning, economics, indigenous studies ... and many other fields.

The Waterways Centre for Freshwater Management, brings together freshwater expertise available across two universities, to offer students access to diverse methodologies, perspectives and management options to safeguard our freshwater resources for future generations.

The Centre is involved in community education and iwi resource management, and maintains close links with external organisations, agencies and industries involved in freshwater use, regulation and research,

For further information on the Centre's qualifications, resources, people and outreach activities go to:
